-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Drawings

Figure 5 should be designated by a legend such as -- **Prior Art** -- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Suganami et al. (Pub. Number US 2003/0185672 A1).

Suganami discloses a variable nozzle control apparatus adapted for a turbocharger in an engine comprising:

a variable nozzle having a vane (230);

an engine ECU (300) for identifying an operating situation of the engine by detected outputs of sensors in the engine and outputting a control signal; and

an electronic control actuator (100) for controlling an opening of the vane in response to the control signal transmitted from the engine ECU (300),

wherein the electronic control actuator includes

an electronic control circuit section (160) for receiving an opening indication information of the vane from the engine ECU (300) and outputting an output signal;

a driving section for receiving the output signal from the electronic control circuit and driving the vane of the variable nozzle through an output shaft (See Paragraphs [0009], [0011], [0013], [0015] – [0017], [0025]); and

an angle sensor (150) for detecting a rotation angle of the output shaft to output an actual angle signal of the output shaft (145) to the electronic control circuit (300) (See Figures 1-2, 4, and 9; (See Paragraphs [0009], [0011], [0013], [0015] – [0017], [0025])).

Allowable Subject Matter

Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The IDS (PTO-1449) filed on May 27, 2004 has been considered. An initialized copy is attached hereto.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Banks, III (US Patent Number 6,652,414 B1) disclose a vehicle engine brake control.
- Okada et al. (US Patent Number 6,067,798) disclose a turbocharger control apparatus and a control method of a turbocharger with a variable nozzle.
- Okada et al. (US Patent Number 6,062,025) disclose an auxiliary brake system.
- Itoh et al. (Patent Number EP 1 304 462 A2) disclose a control apparatus of an actuator.
